

Toolkit for local housing strategies

for autistic adults and adults with a learning disability

Step 7: How much does it cost and what are the benefits of good housing?

This step is about how much different types of housing cost and what the benefits are.

It includes costs and benefits to people, the community, local authorities and the NHS.

How can I contribute to this step? Some examples:

I understand why some types of housing and support cost more than others.

I understand the benefits of each type of housing to people's wellbeing as well as to health and social care systems.

I help decide what the housing strategy should say about cost and benefit.
